## About me

Student of Mathematics (B.Sc.) at the Technical University of Munich (TUM) with over five years of programming experience in C++, Python, and C#. I demonstrate my passion through active participation in hackathons and several internships at IT-focused companies.

## Experience

### RESEARCH / DATA ANALYSIS INTERN; PRAGUE, 2026 MAY - PRESENT

- Applied factor analysis and PCA to selected groups of survey questions to identify latent factors and reduce dimensionality.
- Constructed component-based variables representing groups of related questions for further statistical and probabilistic analysis.

### IOS APP DEVELOPER/WEB DEVELOPER; PRAGUE, 2024 JULY - 2024 OCTOBER

- Led the development of LASAR, an application that notifies users about upcoming events.
- Designed and implemented the app's user interface and overall app design.
- Developed the frontend with a strong focus on intuitive and user-friendly interaction.

### SOFTWARE DEVELOPER; PRAGUE, 2022 - 2022 MARCH

- Creating web applications using C# (Blazor).
- Learning the Reactive UI.

## Education

Technical University of Munich (TUM), B.Sc. in Mathematics,

Oct 2025 - Present (Expected 2028)

## Professional skills & Achievements

### SOFTWARE DEVELOPMENT

- Practice in creating application for IOS devices using Swift. (For instance «tracking profits in stocks»)
- Programming and implementation of own projects using Python, C++, C#. (For example, encryption of texts, Tic Tac Toe etc.)

- Participation in Robosoutěž 2022  and Robosoutěž 2023 (We built our own robot for playing basketball )

#### OTHER

- Languages:     
- Participant of HackaTUM 2025 - one of the largest hackathons in Europe.
- Participant of GreenHack2026 - developing Argus, a platform that supervises and optimises fleets of AI agents in real time
- Mattoni Eagles 2026 - selected as one of 15 finalists for a competitive Czech student leadership & entrepreneurship program.
- Experience in solving Olympiad problems in programming. My Codeforces and Codewars.
- Successful participant in the regional round of the Physics Olympiad.
- Certificate  for completing the "Crash Course on Python" by Google on Coursera.
